Motion RE: Evolution of Ontario Engineers

Whereas the following 4 principles appear to apply and that will continue to more significantly impact the evolution of engineers and applied scientists at least in Ontario,

Principle #1: *the members of a given professional practice are in the best position to understand and effectively govern their practice;*

Principle #2: *The only justification for a Licence is that it is necessary to serve and protect the Public Interest;*

Principle #3: *Human knowledge and understanding of science and technology will continue to expand;*

Principle #4: Science and technology will expand at an increasing rate;

Be it resolved that,
PEO Council create a Task Force with some urgency, to explore the implications of the accelerating pace of technological change and new scientific discoveries on the regulation, licensing and governing of engineers and applied scientists in Ontario; and,
That PEO convene a general meeting of the members forthwith to determine a course of action that the profession may consider as a result of the Task Force's considerations.
