

**Are you enjoying
your 20% fee
increase?**

PEO's spending and
program growth
guarantee that still
more fee increases will
be on the way!

FRESH THINKING AND COMMON SENSE ON COUNCIL!

I'll be your voice on these issues

Spending needs to be controlled. PEO continues to hire governance “experts” and expand programs unrelated to its core mandate. We have too many committees, task forces and expensive external consultants. Spending problems have never been solved by increasing “taxation”! PEO quietly appropriated the power to increase fees and implement major new programs without member approval. It is now abusing that power.

Stop chipping away at our chapters. Chapters are a valuable resource which should be used to support PEO's regulatory, governance and operational efforts. PEO is moving to centralize and control chapters' financial affairs. Chapters are not being given useful roles as PEO's “eyes, ears, voice and hands” around the province. Chapters need adequate funding to perform their work.

“PEAK” should be re-examined. Once PEAK is mandatory, this fruitless program will end up costing you time and money. The long-promised members' referendum on this matter is long overdue. We need to develop comprehensive and helpful practice standards.

Enhance the value of our licence by rigorous enforcement. Engineering jobs should not be taken by non-engineers! To protect the public, licensed engineers should do engineering work.

Stop the erosion of democracy. We are a member-directed self-regulating profession. We have a right to direct our future.

PEO needs to stop its power grab – RESPECT THE MEMBERS
