### **Statement**

Vote for a new voice on Council. PEO needs a strong Western Region Councillor to ensure PEO continues to regulate the engineering profession in the public interest. I am ready to take on this role and assist the PEO to become an even stronger and modern regulator.

With my involvement in PEO at the chapter and committee levels and as a board member of several organizations, I have a strong appreciation of the opportunities to improve PEO. I understand the importance of working collaboratively with other Council members and receiving input from PEO members from across the province before making key decisions that will impact the PEO. As Western Regional Councillor, I will be available to hear the views of Western Region on these changes and any other upcoming Council decisions. I will be available to promptly respond to questions or concerns and act as a guide through the complex PEO system.

During this critical transition period, PEO needs to be keeping its membership informed on fundamental changes, including the digitization of the licensing system and modernization of discipline and enforcement activities. I will be your source of information through regular updates on Council activities and a strong voice to advocate for Western Region.
