Greg Wowchuk, PEng

for **PRESIDENT-ELECT**

The issues have not changed. *Neither has my commitment:*

I am for:

- ✓ An open, transparent, responsive Council, which recognizes—and is committed to—professional, *member-directed*, *self-regulation*.
- ✓ Robust, transparent debate of issues relating to engineering regulation
- ✓ A focus on *lean*, modern regulation, focusing on licensing, enforcement, and discipline—not obsessive, continuous navel-gazing about “governance”
- ✓ Peer review and *volunteer-based* governance, not rule by elites
- ✓ Meaningful communications with—and respect for—our members
- ✓ A renewal of the chapter system as the eyes, ears, and voice of PEO
- ✓ Protecting the public interest *and* addressing the profession's needs. Serving both is the very essence of self-regulated professionalism!
- ✓ **Trust, transparency, accountability, and DEMOCRACY.** My opponent has said “PEO is not a democracy. It is a regulator.” Actually, PEO is **both!**

I am against:

- x Moving power from the membership to Council and then to PEO staff and outside “consultants”. *Our 88,000 members are the “self” in self-regulation.*
- x Political gamesmanship at Council. Reneging on the promised CPD referendum was abusive, disrespectful, and disgraceful. *It betrayed our trust.*
- x A paternalistic professional government which spurns the input of our members. **No more by-law changes without explicit member approval!!**

A PROFESSIONAL ASSOCIATION, RUN BY PROFESSIONAL ENGINEERS

GREGORY WOWCHUK for PRESIDENT-ELECT
