

## Fred Saghezchi

P.Eng., M.A.Sc., FEC

**Degree(s), School(s) Attended:**  
University of Waterloo, Master  
of Applied Science in Mechanical  
Engineering

Participation in  
**Willowdale/Thornhill Chapter**  
since 2003, several roles and  
responsibilities, current  
government liaison chair

Years of registration: **20 Years**

Why is “Canadian experience” going to be replaced by CPD or PEAK? Many engineers who already have years of Canadian experience do not need to go through this evaluation process.

Why can't councilors or president communicate directly with members to find out what they really want or need? Communication Problem

**VOTE FRED SAGHEZCHI**

I am all about **accountability, dedication, integrity, professionalism, transparency and honesty**. With these core values, I will bring innovative new ideas to council:

- **Promote collaboration between members and council**
- **Cooperate with council to make it more effective**
- **Partner with key stakeholders for better and more influential results**
- **Promote the engineering profession**
- **Work to reduce membership fees**
- **Demand financial transparency**
- **Concentrate on essential regulations**
- **Create a bridge between industry leaders, PEO and members**

I need your support to bring positive change. I will not be just another ineffective leader without results. I will fight for a Strong President Act to make sure PEO functions properly
