

I am running for Eastern Regional Councillor. I have a greater understanding of the role from my previous term as Eastern Regional Councillor and Councillor at Large and my years as a volunteer with the Kingston Chapter. I believe in strong and effective engineering self-regulation.

My focus at Council will be to continue to build on the successes of the last 5 years of PEO Council work. This includes supporting the current and future strategic plans and more specifically:

1. A new and improved post-graduation program for Engineering graduates that bridges the gap left when the EIT program ended.
2. A comprehensive review of recently changed/improved processes to identify any gaps or improvements that can be made under a continuous improvement process and work to implement the necessary reforms.
3. Ensure any changes under a continuous improvement process include requirements to ensure newer and emerging discipline candidates including entrepreneurs are fairly assessed.
4. Targeted stakeholder engagement to ensure PEO is reaching out to our Engineering members and partners for their expertise.

If you are concerned with what you have seen me post, or what others are saying, please reach out to me on [Linked In](#) or [cchiddle.erc@gmail.com](mailto:cchiddle.erc@gmail.com) for more information and ask me questions. I value open and respectful dialogue.

I am proud of the work that PEO does. Our volunteers and staff are very hard working. I respect our Council members for the hard decisions they have had to make. I may not fully agree with what decisions have been made, however, I do recognize that each person is passionate about their duties and have made the best decision they could at that time.

With your support and vote I can continue to support PEO, the profession and the needs of the Public.
