

Re/Elect:

Capable, Trustworthy

Guy Boone, P. Eng, FEC

Vice-President Candidate

former Eastern Region Councillor (2 terms; 2016 to 2020)

former Ottawa Chapter Chair (2015) & Algonquin Vice-Chair (2005)

To ELEVATE the ENGINEERING PROFESSION, PEO MUST become more NIMBLE & EMBRACE the "DELEGATED AUTHORITY" it has been given.

TRANSFORM with PROGRESS, or become IRRELEVANT!

My Values & Priorities:

- ✓ **MEMBER RESPECT:** I support greater communications & collaboration with practicing members on issues & directives impacting the engineering profession.
- ✓ **OUTREACH:** I believe the engineer community must reach out & work with other learned societies, companies & governments, to understand, regulate & proactively enforce!
- ✓ **LEADERSHIP:** When making decisions, one must consider multiple scenarios and alternatives before consulting with members and making decision.
- ✓ **PROTECT the PUBLIC INTEREST:** A sacred responsibility that must remain forefront!

Collaborating with License/CoA Holders & Councillors to advocate:

- ✓ **ADVANCED TECHNOLOGIES & EMERGING PRACTICES:** I support the creation of a working group or committee to review how advanced technologies (such as AI & Cyber) can be recognized and licenced.
- ✓ **SUPPORT new Canadian Engineering Graduates & Foreign Educated Professionals** to obtain their required P.Eng experience (EIT is key!).
- ✓ **Continuous Professional Development (CPD/PEAK program):** I support **Peak Review** to enhance it's effectiveness & acceptance, aligned with others & removing CPD requirements for non-practicing engineers.
- ✓ **CHAPTER INCLUSION** - Contrary to the **Cayton Report**, I support **Chapter Reform**, making **Chapters** even more effective with more active Volunteers as an important component of **PEO Engagement Strategy**.
- ✓ **ACTIVE GOVERNMENT ENGAGEMENT:** I support active discussion with elected officials at all levels (**Federal, Provincial & Municipal**) to both be informed and to inform them on key engineering matters.

Vote for a strong advocate for the engineer profession
