

Randall (Randy) Walker

Running for Councilor at large.

My fellow engineers, we are in the voting season.

I run for council to represent the working engineer.

The engineer from another province that expects quick license.

The engineers from other countries that are looking for a better life.

The CofA holders that do that majority of sealed work.

We have a duty to keep the public safe but also to insure seamless access to quality engineers and engineering.

We have much work to do with the Ontario Government to get some changes made. Still need to rid ourselves of the Industrial Exception and bring Ontario in line with all the other provinces.

We need to be leaders in all aspects of what PEO does. We are working towards this goal and with your vote, will continue to be better.

I am not going to ask you to vote. You are the one that makes the decision if PEO serves a purpose to you now or in the future, other than an entity to send money to. If PEO does nothing to help you why vote. However, if they should be doing something that will help you now or in the future, then it is your responsibility to vote and to be involved.

We know the stats, there are a lot of licensed engineers that do not practice engineering and PEO holds little value other than to keep in good standing. These are not the engineers who we work for. We volunteer on council to help engineers who practice day in and day out, refining their craft, making our province better.

If you are one of those engineers, I volunteer my time and energy to try and make your lives better.

Please take some time to cast your vote.

Randy
