Leila Notash, PhD, PEng, FEC, for President-Elect

I am committed to the principal object of PEO: **To regulate the practice of professional engineering in order to protect the public interest.**

I support

- **Higher member involvement** in self-regulation, **with respect** for PEO members and volunteers (Chapters and Committees).
- **Value-based practice** and enhanced **stakeholder engagement** for policy developments and decisions.
- **Enhancing the value** of the **CPD** to the highly competent PEO licence holders and public, **reforming** the **CPD** reporting.
- **Reinforcing** values of **Code of Ethics** and **EDII**; including cognitive diversity and demographic diversity on Council and Committees.
- Reinstating **EIT** (Engineering Intern) program with **higher value.**

As the President, I will guide the Council to address the future of **self-regulated** professional engineering; modern, fair principles for **qualifications and practice in a global society**; recognition and licensing of **emerging disciplines** resulting from rapid advances in engineering as well as **entrepreneurs**, so PEng continues to be relevant.

*I am a good listener, and an active and informed councillor. I have always fought to maintain **PEO's relevance in a changing world** through **TRUST, TRANSPARENCY and ACCOUNTABILITY.***
