

Fellow P.Eng members;

PEO Voting remains open till **10am** on **Monday 24 Feb 2025**. Your **PEO Election Ballot** (Voter ID & Password) was emailed from Vote@SimplyVoting.com.

In light of the **US Tariff threats**, Engineers need to provide leadership to make Canada more Self Sufficient. It is Engineers who design products and manufacturing processes that build our Economy. PEO Council needs to take the lead to support National Engineering Leadership and collaborate with our elected officials & industry leaders to build a strong economy.

My **Council Priorities** remain as follows:

<input type="checkbox"/> EIT Re/Instatement Framework	<input type="checkbox"/> Supporting EIT Experience, with Mentorship & 2-year Internship	<input type="checkbox"/> Supporting Emerging Disciplines, with Rights to Practice
<input type="checkbox"/> Enhancing CPD/PEAK, with greater alignment across all Canadian Jurisdictions & Engineers Canada support.		<input type="checkbox"/> Council & Election Reform, with Evaluation of Governance Framework & Councillor Remuneration.

In support of **Emerging Disciplines**, PEO needs to **create a Task Force(s) of Practitioners** within the various Emerging Disciplines to advise the PEO Council what actions are required. **Ontario Bill 194** (Cyber & AI) has been passed, and there still may be an opportunity for PEO involvement... Similar **Federal Bills C-26 & C-27** were tabled and had **Engineers Canada** support.

PEO Practice Standards (such as the recent **Crane Inspections**) & Policies must be **Peer Reviewed** by P.Eng Practicers. PEO Staff worked with the Government Ministry to fast track changes, although the Practice Standard has been dormant for 10 years. I propose that the **Professional Standard Committee (PSC)** along with **Licensing & Enforcement Committees** report to RPLC & Council be reinstated.

Please share with me your issues & concerns. I fully support our **Engineering Self-Regulation** & your **Member Input & Votes** are necessary!

 Regards, **Guy Boone, P.Eng** ([PEO](#), [PEGNL](#), [NAPEG: NWT & NU](#) & [Engineers Yukon](#)) **FEC**
