

TRUST, TRANSPARENCY, and ACCOUNTABILITY

Re-Elect **Vaj Banday** as PEO Councillor-at-Large | www.votevaj.com

Fellow members and Engineers: In my 1st **Eblast**, I touched on PEO's continued neglect of emerging disciplines. In my 2nd **Eblast**, I spoke about transparency in council decision making, support for Chapters, and CPD reform.

Engineer members are at the heart of self-regulation. Our collective voice is essential in shaping the future of our profession. Together, we have the responsibility to uphold our values and protect the interests of the public.

I believe:

Engage government - PEO must engage with all levels of government to develop a science and technology roadmap. In the face of the current Trump threats, Canada must become more self-sufficient. Ontario engineers are at the center of Canada's industrial heartland. Given the opportunity, Ontario engineers can promote engineering innovation and improve manufacturing productivity.

Unite the Profession – We need greater collaboration with OSPE and all the learned societies to create a practical, lean, and contemporary regulatory framework.

Bring back the EIT program – A formal engineer-in-training program will enable all new graduates and foreign-trained professionals gain valuable work experience before full licensure.

My **passion** for our profession, combined with the **leadership** skills and **experience** I gained during my previous terms on Council, are what is needed for the Councillor-at-Large role.

Please vote **VAJ BANDAY** for Councillor-at-Large
